HWM-Online

Data monitoring system

HWM-Online is a multi utility data monitoring system, suitable for monitoring and analysing utilities (water and gas) usage in commercial industries. The system provides single platform access to data from any internet enable device

The online reporting suite helps organisations gain a better understanding into their energy usage, enabling immediate and specific investigation into exceptional usage, leading to elimination of waste and cost reductions. Can be customised to include company branding.

Key Features and Benefits

- **Simple:** Easy to use and highly convenient.
- **Cost effective:** Can be used to identify exceptional usage in targeted areas quickly and efficiently.
- **Alarm:** Enable prompt action to be taken to resolve problems.
- **Secure:** Password protected access to read only data ensures that data remains secure and protected.
- **CSV export option:** Enables data to be easily exported into a spreadsheet or other document for analysis.
- **Meter reading:** Statistics displayed as Mean, Min, Max, and Volume etc.
- **Mouse over functionality:** Enables graph data to be clearly pinpointed.
- **Google Map function:** Pinpoints logger position to enable easy identification and location
- **Fleet reporting option:** Enables loggers requiring investigation to be identified quickly.
- **Map display:** Logger location feature.

All Images, text and designs are protected by international and UK copy write law, and remain the property of HWM. It is against the law to copy or use any of the content from HWM website or literature without the written consent of HWM. HWM Ltd. reserve the right to vary the specification. **Issue 1. 03:2017**

Applications

With no software to download, the user simply enters their unique password and selects the required viewing period. Data is displayed in graphical and table format which may be exported as a csv file for further analysis.

Historical data can be compared with current results to identify wastage and enable savings to be calculated.

To safe guide security and keep all data secure and protected, the system permits read only access, meaning each user is only permitted to see the loggers that they are authorised to see.
